

# RES Dynamic Desktop Studio

# RES Dynamic Desktop Studio

Today's desktops have grown tremendously complex, but RES Software helps break down the desktop into independent components that are much simpler and more cost effective to manage. RES Dynamic Desktop Studio helps you analyze, simplify, automate and manage each user's experience through one console.

## Dynamic Desktops—A Different Approach

Change in IT is inevitable. Operating systems will need to be upgraded, users will come and go, new hardware will be deployed, and technology will continue to advance in ways we haven't even dreamed of.

After using logon scripts, group policies, and different rights in Active Directory, businesses are realizing that just plugging the holes won't work for the future. Maintaining all users and offering them what they need, exactly when they need it, requires a different approach.

It's time we stopped avoiding change and started looking for ways to make change easier. Create an IT environment that supports change. RES Software Dynamic Desktop Studio prepares your business and technology investments for the future.

Using advanced technology, RES Dynamic Desktop Studio is able to create adaptive desktops optimized for your users based on their needs at that time and since that workspace is centrally managed and separated from the hardware and operating system, making changes to your infrastructure is a snap.

## The Move to Dynamic Desktops Means Big Benefits for IT:

**Make future changes easier** by migrating to new technologies such as operating systems, or from a physical to a virtual desktop platform with virtually no user impact.

**Reduce costs** by realigning the valuable time and money saved from desktop management to more critical needs.

**Enhance security and compliance** by ensuring compliance and security for access to applications, segregation of duties, license compliancy and user-centric portable security.

**Become more strategic** by moving away towards an approach that makes your business ready for the future.

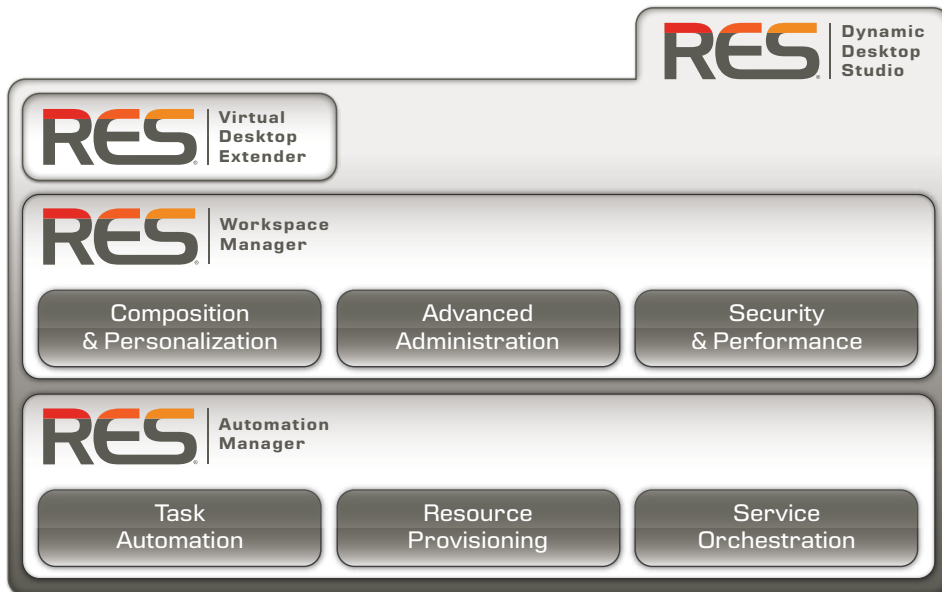

**Deliver IT as a service** by allowing users access to self-service IT, delivering optimized workspaces, and reducing help desk calls dramatically.

Dynamic Desktop =  
OS + Apps + Workspace

## RES Dynamic Desktop Studio

While many different technologies may claim to be a cure for today's complex IT department, RES Software delivers an independent solution that works with your existing infrastructure and adapts to your future business needs, so you can move to a full dynamic environment at your own pace.

RES Software offers a complete dynamic desktop solution that makes IT as a service possible, providing self-service IT and easy, secure desktop access. It combines reverse seamless technology, context-aware user workspaces and advanced automation capabilities, including service orchestration to give IT everything they need to make their desktop environments fully dynamic.

#### **RES Virtual Desktop Extender (VDX):**

Patented and proven reverse seamless VDX technology provides the unique ability to enhance a virtual desktop with applications that run locally, eliminating the need for users to log into multiple sessions to access applications that can't be virtualized.

#### **RES Workspace Manager:**

Allows IT to centrally manage and dynamically create a computing environment that provides optimized access to applications, data, printing and personalized settings based on the user's needs and the system's requirements. The solution is Microsoft Windows OS and application delivery independent. Zero-profile technology eliminates scripting and solves profile challenges.

#### **RES Automation Manager:**

Enables IT professionals to deliver any set of changes to Microsoft Windows environments, whether hosted, virtual, or web-based and automates provisioning of IT resources, all from a single console.

#### **Service Orchestration Module:**

Add-on to Automation Manager unites with Workspace Manager to automate employee on boarding/off boarding, handle self-servicing requests, resource provisioning and migration or decommissioning of applications.

### **10 Reasons to Make Your Desktops Dynamic:**

1. Prepare your infrastructures for future changes.
2. Reduce desktop total cost of ownership.
3. Simplify migrations to new operating systems.
4. Drive security from the user level.
5. Enforce business rules.
6. Give your users access to the right information they need at the right time.
7. Realign IT resources to focus on more strategic projects.
8. Grant users access to local and virtual applications within the same session.
9. Work within a single management console, even in mixed environments.
10. Deliver IT as a service to users.

## **Managing Your Desktops With RES Software:**

There are many advantages to working with RES Software to make your desktop infrastructure dynamic. Here are just a few:

### **Adaptive**

RES Software helps you adapt your IT management maturity and can take you from chaos to order in small, digestible steps.

### **Independent**

RES Software is agnostic. Our software works with your current Windows infrastructure regardless of your choice in application delivery, operating system, or hardware — even if you have a mixed environment.

### **Context Aware**

By dynamically creating the workspace at the point of logon, RES Software allows IT to control what applications make sense for the user in their dynamic circumstances.

### **Complete**

RES Software offers a complete Dynamic Desktop solution that makes IT as a service possible, providing self-service IT, and easy, secure desktop access.

### **Cutting-Edge Architecture**

Features like zero-profile technology, desktop transformation, Virtual Desktop Extender (VDX) and user-centric security make RES Software the most robust platform available, without adding extra operating or management complexities.

### **Non-Disruptive**

RES Dynamic Desktop Studio works with your existing infrastructure. No need to tear out what you have today; just add RES Software to the mix and move towards a more dynamic desktop infrastructure at your own pace.

---

## About RES Software

RES Software, the proven leader in dynamic desktop solutions, is driving a transformation in the way organizations manage, maintain and reduce the cost of their desktop infrastructure. The RES Software award-winning, patented products enable IT professionals to manage and deliver secure, personalized and compliant desktops independent of the underlying computing infrastructure – thin clients, virtual desktops, physical desktops, or server-based computing environments. The company empowers customers, from small to medium-sized businesses to global enterprises, to reduce desktop complexity and meet the essential needs of a dynamic workforce that requires on-demand access to their personalized workspaces.
